Mr. Kraemer: We have verified via our legal department that all is good to move forward.

Thank you for the advanced notification.

Take care,

Cathy Huft

Subject: FOIA release

Alan,

I hope you are good.

The EPA received a Freedom of Information Act request from Greenpeace regarding communications that we had regarding our hydraulic fracturing study with industry. We are going to probably release email records showing that we talked and that you helped us formulate our thinking on the potential use of Fracfocus to estimate fresh water volumes vs. non fresh water volumes. This is not news since it is reported in the December 2012 EPA status report. The only way not to release would be if there were any issues of business confidentiality to the attached email exchanges. I do not see any. Let me know if you have any concerns.

Our Athens team is going to refine our Garfield County modeling in the next few months (Phase II). We may need to come out for a field trip!

Cheers,

Steve
